

- Outreach page
  - General
    - Change how it looks when searching for people to a more “signal look” (i’ll do this)
    - Change save for later toggle to not look vibe coded
    - Work on Prompt Engineering for emails
    - Make attachments easier to add/look more obvious
    - Figure out why About the person doesn’t work for some people
    - When you reload the page after having searched something, it will briefly show you the original homie page, then load the profiles you previously had loaded and show that
    - Make it so when i open the website, it doesn’t glitch and say google at the top right for a sec and then show the navigation (lmk if you don’t understand what I mean)
    - Make it so when you click anywhere on a profile card, it opens the email, not just when you press send email
    - Make it so if you start writing an email, and if you stop and x out, when you come back to the person, what you had before is saved. It should also be saved in a “draft” section on the website
  - AI Search

- gave two responses, should be one
- Make the sidebar look a little more like cursor
- Move clear chat button

- change this so it is more informative and guides the user through the process well
